100%
Tool Management!

Digital. Experienced. Powerful.

**100% Tool
Management**

It's time to manage your tools:

✓ Complete transparency and increased productivity

✓ Efficient and reliable processes throughout the entire shopfloor process

✓ Optimized connectivity and automated data flow

TDM users confirm:

- 30 % tooling costs

- 30 % machine down times

- 50 % tool variety

Now that's **impressive!**

01 | Data

Create a duplicate of your tool inventory with our smart tools. Generate 3D twins, geometries and cutting data and utilize exactly the data you need to succeed!
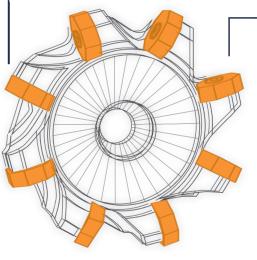

02 | ERP

Only purchase the tools you actually need! The TDM ERP interface optimizes your entire tool procurement process and lowers your tooling costs!

08 | Analysis

Utilize the full potential of your data! Use TDM to analyze and compare comprehensive sets of tool usage information, even on the machine. Protect your know-how for your future success.

03 | CAM/SIM

TDM offers more than 30 CAM/SIM integrations. You have access to CAM-optimized tool data to make your CAM processes faster, better and more reliable.

07 | Machines

Reduce down time to a minimum, transfer data automatically to the machine. This strategy is sure to pay off!

04 | MES

Plan your production while conserving resources. Use TDM data for your production planning and benefit from optimized machine occupation, short lead times and minimized setup times.

06 | Presetting

Measure and preset without manual data entry! TDM provides the nominal data and tolerances to the presetter. TDM receives the actual measurement values, saves them, and transfers them to the machine.

05 | Logistics

Just imagine never having to search for tools again! Organize the entire shopfloor process all the way to the machine. 100% tool availability – 100% reliability.
